Subject index

- Acceleration effect 178, 261
 Angular momentum
 for composite particle 16, 181, 243, 339, 491
 equation for composite particle 16, 20, 194, 199, 239, 339, 491
 Angular momentum balance, macroscopic 60, 63, 66, 279, 284, 384, 508
 Angular momentum conservation, macroscopic 64, 65, 66, 284, 285, 385, 509
 Asymptotic subsidiary condition 154, 185
 Average (or macroscopic) quantities and laws
 general definition of 21, 248, 369
- Blount picture 433
 Boyle–Gay-Lussac equation of state 99
 Breit Hamiltonian 467, 473
- Canonical transformation
 for dipole Hamiltonian 110
- Centre
 of energy 181, 226, 243, 484
 of mass 12, 336
- Charge conservation
 atomic 11, 172, 176
 macroscopic 25, 257
- Charge density
 atomic 10, 176, 335, 482
 in electrolytes, metals and plasmas 33, 34, 36
 macroscopic 24, 258, 373, 496
 for spin particles 479
- Cherenkov effect 306
 Classical limit
 of equations of motion and spin 438
- of Weyl transforms 344, 348
 of Wigner function 354
 Clausius–Mossotti law 98, 297
 Commutation rule for position operator components
 in Dirac theory 423, 459
 in Klein–Gordon theory 445, 461
 in Schrödinger theory 320
 Commutation rule for spin operator 424
 Completeness or closure relations 319, 324, 360
 Constitutive relations 26, 95, 290
 Continuity equation for distribution function 247
 Correlation function 23, 248
 mean 56, 311
 Wigner 372, 394, 496
 Correlation length 47, 268, 382
 Coulomb gauge 141
 Covariance condition for position and spin operators (*see also* Lorentz transformation properties) 416, 417
- Current density
 atomic 6, 10, 17, 335, 482
 conduction 29
 convection 29
 in electrolytes, metals and plasmas 33, 34, 36
 four-vector – for charged particle 128
 macroscopic 24, 258, 373, 496
 for spin particles 479
- Darwin Hamiltonian 165, 467
 Darwin Lagrangian 142
 Debye–Langevin law 296
 Debye shielding 52
 Deformation and free energy 114, 403, 524

- Deformation gradient tensor 83
 Deformation tensor 71, 78
 Density operator 326
 evolution operator for 357
 Depolarizing tensor 70, 106
 Dilatation tensor 78
 Dipole moment (*see also* Magnetic dipole moment) 8
 induced 295
 macroscopic – density 30, 259
 permanent 296
 polarizations up to 30, 177
 tensor 191
 Dirac equation
 classical 153
 Lorentz invariance of 413, 427
 quantum-mechanical 410, 425, 452
 rotation invariance of 411, 425
 spatial inversion invariance of 412, 426, 453
 time reversal invariance of 413, 427, 453
 translation invariance of 411, 425
 Dirac picture 419
 Displacement (or excitation) tensor 172, 256
 Displacement vectors 24
 effective 35
 Distribution functions 22
 continuity equation for 247
 covariant 246
 for mixtures 23, 51, 269
 retarded and advanced 252, 255
 synchronous 251, 255, 309
 Ehrenfest equations 354, 409
 Electrolytes
 charge, current and polarizations for 36
 Electrostriction 98, 104
 Energy
 centre of 181, 226, 243, 484
 free – and deformation 114, 403, 522
 macroscopic internal 50, 54, 57, 287, 383, 507
 transport velocity 304
 Energy balance, macroscopic 41, 49, 54, 57, 378, 383, 502, 507
 Energy conservation, macroscopic 50, 55, 383, 507
 Energy equation, atomic 14, 16, 338, 488
 semi-relativistic limit of 236
 Energy–momentum, macroscopic
 conservation of 263, 269
 Energy–momentum tensor
 field and material part of 263, 265, 275, 300
 for fluids 272, 292
 for set of charged particles 155, 157, 217
 for single charged particle 148, 154
 symmetry of 274, 302, 312
 uniqueness of 300
 Entropy 71
 balance equation 91, 289
 production law (global) 93
 Exchange coupling 516
 Excitation (or displacement) tensor 172, 256
 Excitation vectors, *see* Displacement vectors
 Feshbach and Villars's formulation of Klein–Gordon equation 440, 446
 Feynman path integral 366
 Fields
 from composite particles 6, 11, 205
 dual 129
 expanded in powers of c^{-1} 137
 interatomic 12
 intra-atomic 12
 Liénard–Wiechert 142
 macroscopic 24, 255, 373, 496
 minus – at world-line of particle 146, 221
 multipole expansion of 171
 plus and minus 137
 from point particles 3, 5, 137, 330
 self- 144, 165
 from spin particles 477
 Field equations
 for composite particles 10, 168, 176, 333, 481
 macroscopic 24, 255, 373, 496
 Maxwell–Lorentz 3, 127, 318
 for spin particles 478
 Weyl transform of – for point particles 328

- Fizeau's experiment 306
 Fluctuation velocity 28
 Fluids
 angular momentum law for 63, 284, 384, 508
 electrostriction in 98
 energy–momentum tensor for 272, 292
 heat flow for 50, 287, 383, 507
 momentum and energy laws for 47, 49, 263, 383, 501, 502
 polarizations for 35
 pressure for 48, 383, 501
 thermodynamics for 67, 69, 287, 289, 385, 390, 509, 513
 Fluxion effect, multipole 178, 261
 Fluxion space 22
 Foldy–Wouthuysen transformation 418
 Force
 on composite particle 14, 19, 188, 193, 202, 218, 337, 487
 on Dirac particle 437, 477
 electrodynamic 14, 196
 Helmholtz 96, 298
 Kelvin 14, 48, 195, 437
 long and short range 13, 39, 206, 337, 377, 487, 498
 Lorentz 5, 14, 146, 155, 195, 279, 437, 478
 macroscopic ponderomotive 47, 276, 383, 501
 magnetodynamic 196, 233, 244, 278, 437, 486, 502
 radiation damping (or self--) 146, 217, 220
 Form effect 104, 515
 uniform 124
 Galilei invariance 27, 58, 67, 384, 405
 Gauge transformation 4, 129, 329
 Gauss system 3
 Generator
 of Lorentz transformation 415
 of spatial rotation 412, 434
 of spatial translation 411
 Gibbs relation, *see* Thermodynamics, second law of
 Giorgi system 3f
 Green function 130
 longitudinal terms in 131
 retarded and advanced 134
 Gyromagnetic factor 199
 Hamiltonian
 Breit 467, 473
 for composite particles in fields 70, 110
 Darwin 165, 467
 for Dirac particle 410, 418, 425, 431
 for two Dirac particles 467, 473
 for Dirac and Klein–Gordon particle 475
 for Klein–Gordon particle 440, 444, 446, 450
 for point particles in fields 6, 317
 Heat
 Joule – production 93, 290
 supplied 68, 93, 385
 Heat flow
 for fluids 50, 287, 383, 507
 for plasmas 55
 for solids 57

- Solids, crystalline
 - angular momentum law for 66
 - electro- and magnetostriction in 104, 515
 - heat flow for 57
 - momentum and energy laws for 55
 - pressure for 57
 - thermodynamics for 69, 82, 513
- Specific volume 58
- Spin equation (*see also* Angular momentum)
 - for Dirac particle 437
 - semi-relativistic approximation of 196, 239
 - for set of spin particles 480
- Spin operator for Dirac particle 421, 435
 - commutation rule of 424
 - transformation properties of 415, 428, 458
- Spin-orbit coupling 473
- Spin-spin interaction 473, 516
- Spur (*see also* Trace) 494
- Statistical weights 369, 391, 493
- Surface effects in thermodynamics 526
- Susceptibility 95
 - tensor 103
- Thermal wave length 382, 398
- Thermodynamics, first law of 67, 287, 385, 509
- Thermodynamics, second law of
 - for fluids 69, 289, 390, 513
 - for plasmas 79, 290
 - for solids 82, 513
- Time reversal invariance
 - of Dirac equation 413, 427, 453
 - of Klein-Gordon equation 440, 442, 447
 - Time reversal transformation properties
 - in Dirac theory 415, 429
 - in Klein-Gordon theory 443, 449
 - Torque (or moment)
 - on composite particle 17, 190, 193, 202, 218, 339
 - on Dirac particle 438
 - long and short range 17, 61, 206, 339
 - macroscopic ponderomotive 63, 285, 385, 509
 - semi-relativistic approximation of 286
- Trace
 - of operator 321
- Transformation
 - canonical – for dipole Hamiltonian 110
 - gauge 4, 129, 329
 - Legendre – in thermodynamics 68
 - Lorentz 130, 209
 - Poincaré 130, 452
 - Pryce-Foldy-Wouthuysen 418
- Translation invariance
 - of Dirac equation 411, 425
 - of Klein-Gordon equation 439, 441, 446
- Translation transformation properties
 - in Dirac theory 415, 428
 - in Klein-Gordon theory 442, 448
- Unipolar induction machine 259
- Variational principles 304
- Variations
 - asynoptic 87
 - syntopic 86
- Vectors, polar and axial
 - transformation properties of 412, 426, 442, 447
 - velocity –, barycentric, bulk or macroscopic 38, 262, 376, 497
- Wall potential 114, 386, 403, 524
- Weyl transform 319, 341
 - and classical limit 344, 348
 - examples 344
 - generalization of – to particles with spin 361, 430

- of Maxwell-Lorentz field equations 328
- of potentials 329
- of product of operators 324, 348, 362, 367, 431
- Wigner correlation function 372, 394, 496
- Wigner function 326, 349
 - classical limit of 354
 - generalization of – to particles with spin 363
- partial 370, 391, 494
 - and probability density 327, 350, 370, 392
 - propagator of 357
 - properties of 350, 392
 - reduced 371, 393, 495
 - reduced – for perfect gas 394
 - in statistical mechanics 369, 391, 493
