The diagram illustrates the normalized runtime for different graph data structures and operations. The x-axis represents different operations labeled as 'Edge List', 'Reverse Edge List', 'Vertex Pull', 'Vertex Push', and 'Vertex Push Warp'. The y-axis denotes the normalized runtime. Each bar color corresponds to a specific operation:

- Red: Edge List
- Light Blue: Vertex Pull
- Dark Blue: Vertex Push
- Green: Vertex Push Warp
- Brown: Reverse Edge List
