

Simulation of Multiphysics Multiscale Systems

<http://www.science.uva.nl/~valeria/SMMS/>

iccs

June 23-25, 2008

Krakow, Poland

in conjunction with the International Conference on Computational Science

Introduction

Simulation of multiphysics and multiscale systems poses a grand challenge to computational science, with vast applications in chemical engineering, plasma physics, material science, biophysics, aerospace and automotive sectors. Most of the real-life systems involve interactions amongst a **wide range of physical phenomena**. In addition to that, the **time and length scales** of the individual processes involved often differ by orders of magnitude. Numerical simulation of these multiphysics and multiscale problems requires development of sophisticated models and methods for their integration, as well as efficient numerical algorithms and advanced computational techniques.

This workshop aims to bring together computational physicists, numerical specialists and computational scientists to push forward this challenging multidisciplinary research field, and to foster cross-fertilization between all fields of applications.

Topics

Specific topics include (but are not limited to):

- Modeling of multiphysics and/or multiscale systems. Of particular interest are: Monte Carlo methods, particle-based methods, mesoscopic models such as cellular-automata, lattice gas and lattice-Boltzmann methods, computational fluid dynamics and computational solid mechanics;
- Multiphysics and/or multiscale modeling of biological or biomedical systems. This includes computational models of tissue and organo-genesis, tumor growth, blood vessels formation and interaction with the hosting tissue, biochemical transport and signaling, biomedical simulations for surgical planning, etc.
- Novel approaches to combine different models and scales in one problem solution;
- Challenging applications in industry and academia, e.g. time-dependent 3D systems, multiphase flows, fluid-structure interaction, etc.;
- Advanced numerical methods for solving multiphysics multiscale problems;
- Problem solving environments for simulation of multiphysics multiscale systems.

Papers

We cordially invite you to submit a paper presenting the results of original research or innovative practical application in the area of modeling and simulation of multiphysics and multiscale systems. Papers of **4 to 10 pages**, written in English and complying with the [LNCS format](#), should be submitted electronically through the [ICCS submission engine](#).

All papers will be peer reviewed. Accepted papers will be published in the conference proceedings in [Lecture Notes in Computer Science](#) series. The proceedings will be available at the conference. At least one author of an accepted paper must register and present the paper at the workshop.

A selected number of (extended) papers will be invited to the special issue of the [International Journal for Multiscale Computational Engineering](#) after the conference.

Important dates

Short abstract (1 page): December 12, 2007
Full paper submission: January 10, 2008
Notification of acceptance: March 1, 2008
Camera-ready papers: March 15, 2008

Program Committee

Joerg Bernsdorf, NEC Europe Ltd, Germany
Bruce Boghosian, Tufts University, USA
Bastien Chopard, University of Geneva, Switzerland
Alfonso Caiazzo, University of Amsterdam, The Netherlands
Vince Ervin, Clemson University, USA
Sergey Gimelshein, University of Southern California, USA
Yuriy Gorbachev, St. Petersburg State Polytechnic University, Russia
Martin van der Hoef, University Twente, The Netherlands
Alfons Hoekstra, University of Amsterdam, The Netherlands
Jaap Kaandorp, University of Amsterdam, The Netherlands
Chris Kleijn, Delft University of Technology, The Netherlands
Hector M. Klie, University of Texas, USA
Manfred Krafczyk, Technical University Braunschweig, Germany
Valeria Krzhizhanovskaya, University of Amsterdam, The Netherlands
Antonio Lagana, University of Perugia, Italy

Jonas Latt, Tufts University, USA
Hyesuk Lee, Clemson University, USA
James Liu, Colorado State University, USA
John Michopoulos, US Naval Research Laboratory, USA
Tinsley Oden, The University of Texas at Austin, USA
Francois Rogier, ONERA-CERT, France
Francois-Xavier Roux, ONERA, France
Peter Slood, University of Amsterdam, The Netherlands
Ruud van der Sman, Wageningen University, The Netherlands
Dominik Szczerba, Swiss Federal Institute of Technology, Switzerland
Tao Tang, The Hong Kong Baptist University
Ali Turan, The University of Manchester, UK
Jordi Villa i Freixa, IMIM-UPF, Spain
Alexander Zhmakin, SoftImpact Ltd, Russia

Workshop Organizers

Workshop chairs: **Valeria Krzhizhanovskaya** and **Alfons Hoekstra**
University of Amsterdam, The Netherlands
E-mail: SMMS@science.uva.nl

Vice-chairs: **Bastien Chopard**, University of Geneva, Switzerland
Yuriy Gorbachev, St. Petersburg State Polytechnic University, Russia
